Career Objective

Computer Science undergraduate seeking a Python Developer role. Hands-on experience building RESTful APIs with Python and FastAPI, working with SQL databases (PostgreSQL, SQL Server), and deploying applications on AWS using Docker and CI/CD. Eager to write clean, reusable code, debug technical issues, and learn new technologies as part of a team.

Technical Skills

- **Languages:** Python, SQL, JavaScript
- **Backend:** FastAPI, REST APIs, Pydantic, SQLAlchemy, HTTP Methods
- **Databases:** PostgreSQL, SQL Server
- **Frontend:** HTML5, CSS3, React, Bootstrap
- **Cloud & DevOps:** AWS(Basic), Docker
- **Tools:** Git, GitHub, VS Code

Projects

AI-Powered Full-Stack Project Mentoring Platform *Python, FastAPI, SQLAlchemy, SQL Server, React, Ollama*

- Built a full-stack platform for project planning, task management and progress tracking using React.js and a Python FastAPI backend.
- Developed RESTful APIs with FastAPI, implementing routing, standard HTTP methods and proper HTTP status code handling.
- Implemented request validation using Pydantic models, ensuring structured data reaches the database and invalid input returns clear errors.
- Performed database operations using SQLAlchemy ORM with SQL Server to store and retrieve project, task and progress data.
- Integrated Ollama to run a local AI model that generates structured tasks and milestones from user requirements through backend APIs.
- Connected the React frontend to the backend so users can create plans, view generated tasks and monitor progress.

Personal Portfolio Website *React, JavaScript, HTML5, CSS3*

- Developed a responsive portfolio website to showcase projects, technical skills and professional information.
- Structured the application using reusable React components for consistent, maintainable sections.
- Implemented responsive layouts so the site displays consistently across desktop, tablet and mobile screens.
- Integrated direct links to email, GitHub and LinkedIn for professional contact and networking.

Internship Experience

A2R Software Consulting Pvt. Ltd. Summer 2026
Cloud Computing Intern *Remote*

- Deployed a containerized web application on AWS using Docker, Amazon ECR and ECS Fargate.
- Worked with an end-to-end CI/CD workflow using GitHub, AWS CodeBuild, Amazon ECR and ECS Fargate for application build and deployment.
- Configured and tested PostgreSQL database connectivity using Amazon RDS as part of the deployment workflow.
- Troubleshot deployment issues involving IAM permissions, Docker configuration, container networking, health checks and load-balancer configuration.
- Gained practical exposure to AWS services (EC2, S3, VPC, IAM, Lambda, CloudWatch) and foundational exposure to Microsoft Azure.

Education

Aryan Institute of Engineering and Technology, Bhubaneswar 2023 – 2027
B.Tech, Computer Science and Engineering

Hobbies & Interests

Exploring Python and full-stack technologies, building practical applications, and continuously improving my software development skills.
